

REMARKS

Claims 1-10 are pending in the application.

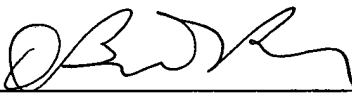

This amendment is made to indicate relationship of prior applications and correct minor errors in the originally-filed specification.

Moreover, the language added to the paragraph beginning at line 10 on page 4 is further defining "a monocular execution of the telescopic system" presented in the originally-filed specification. Consequently, no new matter is added.

Examination and allowance of the application is respectfully requested.

Respectfully submitted,

Dated: 1-21-04
